

Tiny House for Sale

Own your own Tiny House on wheels – made from reclaimed materials!

It's a compact, architect designed house. Built on a new 3 tonne trailer, made with a recycled Oregon timber frame, beautifully fitted with salvaged doors and windows and clad in reclaimed timber and corrugated iron.

Tiny House dimensions

External: Length 4.8m Width 2.3m
Height 4.2m.

Price range

\$23,000 – \$28,000

The Tiny House has been built to lock-up stage with all exterior work complete and a loft big enough for a double bed built internally. It's now completely weather tight and ready for internal fit-out by the lucky new owner.

Alternatively, fit out can be arranged with The Bower post sale, for an agreed fee with quotes.

This Tiny House on wheels is built to relevant vehicle regulations, is already registered and can be towed away after sale. Owning this Tiny House on Wheels you will feel assured that you have helped divert approximately one tonne of building materials from landfill.

Provenance

The Bower's Tiny House was built by participants in Australia's only hands-on *Tiny House Building Course*, offered by Bower Reuse & Repair Centres.

Supervised by master tradesmen and experienced tiny house builders, the Tiny House has been constructed using almost 100% re-used and re-purposed items sourced by The Bower through their Collections & Rehoming service.
